

OMANSHU BHATT

Almora, Uttarakhand, India | +91 8755118493 | omanshu25@gmail.com

PROFESSIONAL SUMMARY

Computer Engineering graduate with hands on experience developing technology driven solutions through academic projects, internships and practical work. Strong foundation in Python, Java, SQL, backend development, databases, AI/ML and core computer science concepts. Comfortable turning technical concepts into practical solutions with a focus on problem solving, clean implementation and continuous learning. Seeking opportunities to contribute to meaningful engineering work while growing across software and emerging technologies as a versatile technology professional.

TECHNICAL SKILLS

Languages: Python, C++, C, Java, JavaScript, Go
Web & Frameworks: React.js, HTML, CSS, JavaScript, FastAPI, Node.js, Django
Data & Databases: SQL, MySQL, MongoDB,
AI / ML: Machine Learning, Vision Transformer, EfficientNet, PyTorch, LangChain
Tools: Git, GitHub, CI/CD, Prisma, Docker, Kafka, Postman
Core CS: Data Structures & Algorithm, Operating System, Database Management System, Object-Oriented Programming

PROJECTS

Distributed Order Processing Platform | Independent Project

- Designed a distributed order processing backend handling asynchronous payment, inventory and notification workflows across services.
- Maintained consistency under concurrent requests and service failure using PostgreSQL transactions and Redis caching, idempotency and retry mechanisms, used Kafka for event driven service communication.
- Containerized the system with Docker and load tested API s to evaluateth roughput and latency.

Tech: Java, Spring Boot, PostgreSQL, Redis, Kafka, Docker

AI Codebase Intelligence Platform | Independent Project

- Built an AI powered platform that ingests GitHub repositories and enables natural language querying across source code.
- Implemented RAGpipeline with code embeddings and vector search to retrieve relevant files and functions before generating contextual LLM responses.
- Developed FastAPI services for repository ingestion, processing, retrieval and inference and docker based deployment.

Tech: Python, FastAPI, React, RAG, LLM, Vector Database, Docker

Deepfake Image Integrity System | Independent / Academic Project

- Built an end to end deepfake detection system spanning a mobile app and a browser extension, backed by a shared inference server.
- Implemented EfficientNet-B0 for lightweight on device detection and Vision Transformer (ViT) for higher accuracy analysis of web and social media images, developed ML pipeline integrating inference.

Tech: Python, PyTorch, Machine Learning, Vision Transformer (ViT), EfficientNet-B0

EXPERIENCE

Trainee Intern | Indian Oil Corporation Limited (IOCL)

- Supported technical and organizational tasks within a large scale public sector engineering environment, gaining exposure to professional workflows and cross team coordination.

Virtual Intern — AI/ML & Robotics | Kodacy

- Completed two virtual internship tracks covering AI/ML fundamentals, data analysis, and robotics/automation concepts.

CERTIFICATIONS

- Oracle — Agentic AI Certified Foundations Associate
- TATA — Young Professional Course Certification
- TATA — Cybersecurity Analyst Job Simulation
- Deloitte — Cyber Job Simulation
- NASA — Hyperspectral Data for Land and Coastal Systems
- Udemy — Web Development Bootcamp

EDUCATION

B.Tech, Computer Engineering (CGPA 7.20) G.B. Pant University, Pantnagar	2022 – 2026
Class XII Beersheba Senior Secondary School, Almora, Uttarakhand	90.40%
Class X Beersheba Senior Secondary School, Almora, Uttarakhand	95.33%
